Duty Cycle

Typical usage pattern

27 lock / unlock operations in 24 hours with a typical transmission duration of 500 milliseconds

Transmitter ON   13,5   seconds / 24 hours

Transmitter OFF   86.386,5   seconds / 24 hours

Duty Cycle: T_{ON} / $T_{(ON+OFF)}$ x 100% = 13,5 / 86.400 x 100 % = 0,015 %
