

Declaration to Test reports T31116-01-00KJ and T31116-01-01KJ

Herewith we declare that the Radio Frequency transmitter 5WK4 9243 fulfilled the requirements according to FCC Part 15 Subpart 15.231(a) and RSS210 Annex A1.1.1 "Signal deactivation".

The unit 5WK4 9243 is a manually operated transmitter. The requirement for this kind of equipment is: "when released the transmitter shall cease transmission within 5 seconds".

The unit 5WK3 9243 cease the transmission in 852ms (see plots at page 27 in Test report T31116-01-00KJ and page 26 in Test report T31116-01-01KJ).

So the requirements are fulfilled.

The plots at page 28 in Test report T31116-01-00KJ and page 27 in Test report T31116-01-01KJ shows the automatically signal deactivation time when the button will not be released. These plots are only for information.
