

FCC ID: KR5HFM4C01

According to 447498 D04 Interim General RF Exposure Guidance v01 section 2.1.2, The power is no more than 1 mW, regardless of separation distance. This exemption applies to all operating configurations and exposure conditions.

The Max Average field strength is 16.08 dBuV/m @ 300m.

=  $16.08 + (40 * \text{LOG}(300/3)) = 96.08$  dBuV/m @ 3m.

102.05 dBuV/m = -1.3 dBm

The Max Average tune-up power is -1.2 dBm, therefore the power is  
-1.2 dBm (0.76 mW) @ 125 kHz

The power is no more than 1 mW, this device complies with the exemption.

**Note:**

1. The Max tune up power referred the Average power of the test report TMWK22090003736KR for RF Exposure assessment purpose.
