

A photograph of a Siemens VDO S122228001 component. The component consists of a black plastic housing with a silver metal shaft protruding from the left side. The shaft has a knurled end, a smooth section, and a threaded section. The housing has a circular opening on the right side, and a small hole is visible on the front face. Two white labels are attached to the housing, one at the top and one at the bottom. The background is a white grid.
