

METHOD:

The EUT RF output connector was connected to a spectrum analyser and to the Universal Radio Communication tester R&S CMW500 (selecting maximum transmission power of the EUT and different modes of modulation) using a 50 Ohm attenuator and a power splitter.

The spectrum was investigated from 9 kHz to 18 GHz for 3G Band IV and LTE Band 4 and from 9 kHz to 8 GHz for LTE Band 12, 13 and from 9 kHz to 26 GHz for LTE Band 7.

The configuration of Resource Blocks and modulation which is the worst case for conducted power was used.
