

INTERTEK TESTING SERVICES

Purpose of Change

The handset and base RF modules of the Model: WW338 are identical in construction, dimensions and electrical circuits.

The main modification are as follows:

1. Change the melody chipset (U501) from OTP package to masking bonding in handset unit.
2. Change software to support four handsets.

All design including RF modules, FHSS algorithm, electronic, electrical, mechanical, PCB layout and cosmetics designs remain the same except are above-mentioned change. Hence, only the following test results are included in this report.

- i) Average Time of Occupancy
- ii) Out of Band Emission
- iii) AC Line Conducted Emission
- iv) Radiated Emission from Digital Section
- v) Transmitter Duty Cycle
