## **4 TEST ENVIRONMENT**

### **4.1 Address of the test laboratory**

**emitel (Shenzhen) Limited  
Building 2, 171 Meihua Road,  
Futian District,  
Shenzhen, 518049  
China**

**FCC Registration No.: 746887**

### **4.2 Environmental conditions**

During the measurement the environmental conditions were within the listed ranges:

Temperature: 15-35 ° C

Humidity: 30-60 %

Atmospheric pressure: 86-106 kPa

### **4.3 Statement of the measurement uncertainty**

The data and results referenced in this document are true and accurate. The reader is cautioned that there may be errors within the calibration limits of the equipment and facilities. The measurement uncertainty was calculated for all measurements listed in this test report acc. to CISPR 16-4-2 /11.2003 „Uncertainties, statistics and limit modelling – Uncertainty in EMC measurements“ and is documented in the quality system acc. to ISO 17025. Furthermore, component and process variability of devices similar to that tested may result in additional deviation. The manufacturer has the sole responsibility of continued compliance of the device.

## 5 TEST CONDITIONS AND RESULTS

### 5.1 Radiated disturbance (electric field)

For test instruments and accessories used see section 6 Part II.

#### 5.1.1 Description of the test location

Test location: Semi-Anechoic Chamber

Test distance: 3m

#### 5.1.2 Photo documentation of the test set-up

#### 5.1.3 Test result

The test was carried out in the following operation mode(s):

- Maximum load + receiving mode

Frequency range: 30MHz to 2000MHz

Min. limit margin -19.6dB at 954.0MHz.

The requirements are **FULFILLED**

#### Remarks:

- 1) According to FCC part 15.33(b), since the EuT is used 318MHz frequency in the device, the upper frequency of measurement is up to 2000MHz.
- 2) During photo mode test, EUT is rotated through three orthogonal axes to determine the maximum emission.
- 3) The receiving antenna can be measured within the frequency range 26MHz to 3000MHz.
- 4) An unmodulated CW signal at the operating frequency of the EuT is supplied to the EuT for all measurements.
