

QAR Long-Term Confidentiality for Internal Photos

R&S considers that the conditions for Long-Term Confidentiality for Internal Photos as indicated in “726920 D01 Confidentiality Request Procedures v01r02” are met:

- QAR is operated in industrial environment and accessible only to authorized persons.
- QAR operators do not need to access to the inside of the QAR to perform their tasks.
- The design of the system prevents easy access to and viewing of internal components/modules/assemblies. (Circuit boards are covered [shielding and back covers on panel])
- The inside of the QAR (panel) needs to be accessed only to perform maintenance and repairs.
- QAR is serviceable only by Rohde & Schwarz personnel or designated/accredited persons (which, by default, would be under obligation not to disclose company confidential information)

An NDA will be executed between R&S and any non-Rohde and Schwarz party that will be given access to the inside of the QAR.

The provided file

`018_RSA_Unilateral_NDA_Template_Jan2021.pdf`

is an example of an NDA that would be executed between R&S and a third party that would have access to the QAR for maintenance, etc.
