Dear Sir or Madam,

Following an inquiry of CSA Group Bayern GmbH to the TCB regarding the definition of the measurement method, the size of the R&S® QPS Walk2000 device does not allow to perform the transmission measurements according to §15.517 and §15.521 using the whole device.

Thus, the TCB deemed it as necessary to perform the UWB measurements according to §15.517 and §15.521 with a single, separate UWB transmitter unit which behaves exactly like an UWB transmitter in the R&S® QPS Walk2000 device, as only one UWB transmitter is active at a time in the application. The measurements according to §15.109 and §15.209 have been performed with a complete R&S® QPS Walk2000 device.

Rohde & Schwarz confirms that only this tested type of transmitter unit will be used in R&S® QPS Walk2000 devices being sold under the FCC/IC certification.
