Mr. Andy Leimer  
Federal Communications Commission (FCC)  
Equipment Authorization Branch  
7435 Oakland Mills Road  
Columbia, Maryland 21046

Dear Mr. Leimer :

We have reviewed the Rohde & Schwarz request for type acceptance of the MR4400 M3SR Series ultra high frequency/very high frequency transceiver, and with the FCC number KVV61020307. The technical data for this transceiver in the 118 - 136.975 MHz band is consistent with the spectrum requirements of Technical Specification Order C37e. We have no objection to the certification of this device.

However, in reference to the frequency range 225 - 399.975 MHz stated in your document, please be aware that the transmission is to be disabled in the 328.6 - 335.4 MHz frequency band.

If you require any additional information, please contact Ms. Margarette Ebate, Spectrum Planning and International Division, ASR-200, at (202) 493-5195.

Sincerely,

George K. Sakai  
Program Director for Spectrum Policy and  
Management
