August 26, 2003

Mr. Andy Leimer
Equipment Authorization Branch
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Subject: FAA letter dated August 26, 2003 re. MR4400 M3SR radio, KVVW61020307

Dear Mr. Leimer:

In the above referenced letter to you, Ms. Ebate points out that in reference to the 225 MHz to 400 MHz band, transmission in the 328.6 MHz to 335.4 MHz band must be disabled. I am pleased to advise you that our research had anticipated this limitation and we have already taken this into account in our planning. Changes in the control of the radio will inhibit transmission in this band.

We are thus able to certify that for all deliveries of the MR4400 M3SR, KVVW61020307, made under FCC regulations, transmission in the 328.6 MHz to 335.4 MHz band shall be disabled.

If there are any questions, please contact me.

Sincerely

Peter H. Foulger
President
