To whom it may concern,

This letter acknowledges and certifies that the printed circuit board assembly used with the RFT Extended Range Universal Transceiver, RFT P/N 0800-0388, will carry the part number 0830-0098. During the FCC certification testing at DLS the photograph for submittal showed a part number from a previous version. The new part number 0830-0098 is only a change in the part number. There are no changes in the layout or the component BOM from the printed circuit board assembly that was tested at DLS.
