LCD TV

Trouble shooting: Please read the following trouble-shooting first when your TV stops working. If no improvement is made after that, please contact the maintenance center for help.

☛ Perform some basic troubleshooting procedures as the following before you contact your local support center. If the problem still exists, please record the model and serial number of your TV, and contact your local support center.

No sound and picture:
- ◆ Check if power cord is properly connected to the wall AC outlet and the outlet is electrified.
- ◆ Make sure you have pressed power on/off button on the front panel.
- ◆ Check brightness and contrast setting.
- ◆ Checking volume setting.

Picture ok, no sound:
- ◆ Check volume setting.
- ◆ Check if Mute button on remote control is pressed.

No picture or only mon -ochrome picture:
- ◆ Check color system setting
- ◆ Sound system

Interfered sound or pic -ture:
- ◆ Try to find out the equipment that brings interference and keep it away.
- ◆ Try to plug power cord into another AC outlet.

Poor picture or picture distortion:
- ◆ Check the antenna (direction and location) and/or cable connection.

Remote control cannot work:
- ◆ Replace batteries with new ones
- ◆ Clean the upper edge of remote control (IR transmitter)
- ◆ Check the batteries' contact with the polarities of battery compartment.

FCC Rules

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the followingmeasures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
