DUT on OATS (close-up)

# HF Testing

A photograph of a high-frequency (HF) testing setup. The setup is housed within a white styrofoam enclosure. On the left, a metal probe or antenna is mounted on a white foam base. In the center, a blue foam block is placed on a white foam base, with a black horn-shaped antenna pointing towards it. On the right, a black horn-shaped antenna is mounted on a white foam base, pointing towards the blue foam block. The background is a white styrofoam wall.
