Subject: Cover Letter for Application

Dear Elliott TCB / FCC,

This application is being filed for an automotive device that incorporates a cellular modem operating under Parts 22 and 24 of the FCC's rules. While not designed to be hand-held or body worn, the installation of this device in a vehicle may cause it to operate when closer than 20cm to persons, therefore a SAR evaluation has been performed and has been included with the submittal documents.

The cellular capabilities are provided by an off-the-shelf GSM/GPRS module that has its own FCC ID (XPYLEONG100) and full modular approval. Other than using a custom antenna with this module, the module is not modified in any way. Therefore we are submitting the test report for the Module to cover all of the antenna port measurements and have only performed radiated spurious emissions and fundamental radiated power measurements on the final host system.

Please do not hesitate to contact us if you have additional questions.

Regards,

A handwritten signature in black ink that reads "Douglas M. Hansen".
