## WIRELESS CHARGING (G1922101)

**Note:** Devices without built-in Qi or PMA wireless charging receivers require an additional Qi or PMA receiver or sleeve.

This feature supports Qi or PMA wireless charging compatible devices.

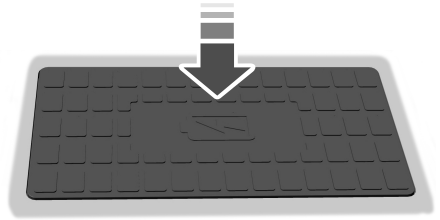

The system supports charging one device on the charging area.

Keep the charging area clean and remove foreign objects prior to charging a device.

Do not place items with magnetic strip, for example passports, parking tickets, or credit cards, near the charging area when charging a device. Damage may occur to the magnetic strip.

Do not place metal objects, for example Key FOBs, coins and candy wrappers, on or near the charging area when charging a device. Metal objects may heat up and degrade the charging performance.

**Note:** Consumer electronics regulate charging and operation at different temperatures and may exhibit varying behavior. The charging port terminates a charge if the device exceeds industry limits.

E250812

**Note:** The charging area is on the center console or lower instrument panel. See **Center Console** (page ?).

**Note:** You can charge a device if the vehicle is off when in accessory mode or if SYNC is on.

**Note:** If the system detects a foreign object or if the device is misaligned on the charging area, a message appears in the display.

Place the device with the charging side down to begin charging.

The charging stops after your device reaches a full charge.

Message	Behavior	Description
Wireless Charger Active	Message on screen display or pop-up window.	Charging occurs after you switch the vehicle on or after a charging disruption.
Charging Terminated Phone misaligned or object between phone and charger detected. Correct the condition to resume charging.	Pop-up window.	The system stops charging your device. If the system detects the phone is misaligned or a foreign metal object on the charging surface.

---

This device complies with Part 15 of the FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- This device may not cause interference, and
- This device must accept any interference, including interference that may cause undesired operation of the device.

**Note:** *Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. The term "IC" before the radio certification number only signifies that Industry Canada technical specifications were met.*
