

Testing Tomorrow's Technology

3/13/2007

Mr. Doug Noble
ATCB

RE: Axonn

FCC ID:L2V-STAMP

Mr.Noble,

Thank you for your comments in your letter of 2/8/2007. Below is my response to your comments on this application. I have included your original comments in my response.

1. Please revise label it needs the manufacturer and model number for Industry Canada.

As in previous application responses, Axonn does not print the Company Name and model number on the drawing print, but includes it in the label order request. This confirms that the Label will contain the words "Axonn Corporation" and the "Model STAMP"

2. Please upload Test Setup Photos exhibit.

Uploaded.

3. Frequencies on the Form 731 and the test report do not match please explain and/or correct.

The original Form 731 contained the projected theoretical High and Low frequencies from the Design engineer. The revised Form 731 contains the actual as measured during Fundamental emissions. Corrected Form 731 Uploaded.

Please contact me with any further questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Feudi'.
