

WIRELESS DATA SOLUTIONS THAT WORK®

---

October 25, 2005

Mr. Louis A. Feudi  
U.S. Technologies  
3505 Francis Circle  
Alpharetta, GA 30004

Dear Mr. Feudi:

Per our discussion, the following statement will be incorporated in the STX2 users and integration manual. Users of this technology are also required to comply with the satellite service providers integration guidelines which stipulate the correct use of the radio frequency spectrum.

RAS Site avoidance

Devices containing the STX2 must comply with the requirements for radio astronomy site avoidance as specified by CFR 25.213. Additionally, integrators must comply with the requirements for use as specified by Globalstar integration manual. Globalstar will provide instruction for frequency use in regions of the world as well as compliance to CFR 25.213.

The paragraph above will be incorporated into the appropriate documentation immediately.

Best regards,

Gary Naden  
VP Business Development and Engineering
