Federal Communications Commission  
Equipment Authorization Division  
7435 Oakland Mills Road  
Columbia, MD 21046

Dear Sirs,

The enclosed application for FCC ID: L2VAX550 is being submitted on behalf of Axonn L.L.C. Axonn L.L.C. respectfully request that this product be certified as a modular Transceiver filing to part 15.247. Please refer to the following information with respect to this product.:

NOTE: The EUT was previously certified with the FCC under FCC ID Number: L2VAX-551. Although all Modular TX issues were addressed in this filing, the final grant did not reflect this fact. Since Axonn L.L.C. wishes to obtain a grant for this product that states that the unit is modular, the unit is being submitted under a new FCC ID Number (FCC ID: L2VAX-550). Most of the information within this filing is being provided from the original submittal to the FCC. Since this information originated from a different laboratory, any unclear issues or new requirements have been addressed and included with this submittal.

I hope that you find that this information fulfills the necessary FCC requirements for the Part 15 Certification requirements. If you have any questions, please feel free to contact me at (770)741-0717.

Sincerely,

Timothy R. Johnson  
Engineering Manager
