Subject: Class II Permissive Change of FCC Part 24 Certification Application for Research In Motion (RIM) Limited, BlackBerry Wireless Handheld

RIM herein is submitting supporting information for our Class II Permissive Change pursuant to our conversation with Mr. Richard Fabina late this afternoon.

RIM confirms that we have not marketed any units of the original configuration for which the FCC grant was issued on Sep 28, 2001. However, a small number of beta units were produced for network field trials. These units will be replaced with the configuration that is being reviewed. Mr. Fabina agreed that since no originally approved units were marketed, and thus the subject permissive change could be approved under the same FCC ID.

Should you require further clarification, or have any questions, please do not hesitate to contact the undersigned.

Yours truly,

A handwritten signature in black ink, appearing to read 'M. Attayi', is written over a vertical line.
