Subject: Response to the FCC Correspondence Reference # 28603 for additional information on RIM BlackBerry Wireless Handheld FCC ID: L6ARAP40GW, 731 Confirmation # EA148109

Dear Steve:

The following addresses the comment on your **Correspondence Reference # 28603**, dated March 10, 2005.

The Ruggedized holster is made of a rigid material designed to allow the BlackBerry handheld to slide in only one way, and that is with the keyboard side facing the user (facing the belt-clip) while in the holster. This positioning has the benefit of protecting the keypad and the large LCD from damage.

Please refer to the photos below showing back / front of device facing user's body.

Please do not hesitate to contact the undersigned should you have any questions.

Yours truly,

Masud S. Attayi, P.Eng.
