**Overall Assessment Letter for RIM RCD21IN
FCC id: L6ARCD20IN**

I have reviewed this application and find it compliant. This is an application for a handheld Blackberry which supports iDEN 800/900, 802.11b/g, Bluetooth and GPS.

Since it also has an USB port for connection to Computers a filing for a Class B Computer peripheral has also been made.

Please note the following:

1: Spread Spectrum Declarations

The various declarations to meet the Spread Spectrum requirements are included in the Operating Description exhibit.

2: SAR

The product supports simultaneous transmission. The test report was reviewed in accordance with KDB 648474 D01 SAR Handsets Multi Xmitter and Ant, v01r05. Simultaneous transmission SAR was not required to be tested and approved.

I underwent the FCC RF exposure training with the FCC in October 2008.

3: GPS

This device contains a GPS receiver to support the FCC E911 requirement for caller location identification and operates at 1.575MHz. The user manual complies with Part 15 Clause 5.

As a result of the assessment review updated SAR and HAC exhibits were received as well as a revised user manual to include the relevant SAR levels.

Yours sincerely

Vina Kerai
Compliance Engineer, BABT
