**Declaration of Conformity**  
regarding  
**Exposure of Humans to RF Fields**  
for the  
**BlackBerry® Presenter Model: RCR11BW**

RIM Testing Services declares under its sole responsibility that BlackBerry® Presenter Model: RCR11BW is in conformity with the RF exposure limits for humans, as specified in FCC OET Bulletin 65 for uncontrolled environment/general population exposure limits.

BlackBerry® Presenter Model: RCR11BW is a portable device and designed to be used in direct contact with the user's body. This device operates on the Bluetooth (2.4 GHz) technology and its maximum conducted transmitted RF power is 9.5 dBm = 8.9 mW.

Based on FCC Mobile and Portable Device RF Exposure Procedures, SAR Evaluation Considerations for Handsets with Multiple Transmitters and Antennas, for an unlicensed transmitter that does not transmit simultaneously with other transmitters and its output is  $\leq 60/f(\text{GHz})$  mW, 1-g SAR evaluation is not required.
