On behalf of Research In Motion Limited, RIM Testing Services hereby declares that the devices with FCC ID: L6AREF30LW/L6AREG50LW/L6AREH50UW , do not support ad-hoc peer-to-peer, and hotspot function.

In DFS frequency bands, the device acts as a client device which does not support radar detection capability. In addition, 5600MHz-5650MHz capability is notched in this device when marketed in US and Canada.

For 802.11b/g/n function of this device, hotspot capabilities and Ad Hoc functionality is not supported in non-US frequencies. For 802.11a 5GHz band, Country code selection is also disabled.

Sincerely yours,

A handwritten signature in blue ink that reads 'Masud Attayi'.
