RE: L6G922802

Dear Mr. Harvey,

The Allgon tower-top amplifier (L6G922802) is designed and intended for use in single carrier mode only. Due to the configuration of the technology in which the TTPA will be used, only one carrier will be possible per TTPA. The unit will be used with a single GMSK modulated carrier.

Best Regards,  
Tim Purvis
