Gentlemen:

I reply for your question.

Question 2): The EUT must be tested in 3 orthogonal planes, not just 2.

Answer:

The measurement of EUT arrangement 1 and EUT arrangement 2 in a right picture were executed, and the measurement was not executed about EUT arrangement 3.

In EUT arrangement 2, the measurement was executed by the horizontal polarized receiving antenna and the vertical polarized receiving antenna. As a result, the measurement of EUT arrangement 3 was executed.

Question 3): Four of the measured frequencies shown on page 8 of the the test report show an * next to them. What does the * indicate?

Answer:

The frequencies indicated by * was measured with a dipole antenna.

Sincerely yours,

Seiichi Izumi
General Manager
