The following information is a list of modifications that will be included in the production process for the above-referenced equipment.

***The power value set in the firmware will be reduced - Field "Tx Power" at the firmware will be set from "38" to "34", the power will be lowered from 29.85mW (MAX) to 24.21mW (MAX) – Please refer to the test report page 23**

The EUT tested before is not carried into mass production stage and the power of our final products will be tuned as the value attested above.

I sign below and assure that all these changes will be done before the product selling to the public.

Thank you for your favorable considerations upon this statement.
