United States

Date: 4th June 2021

Federal Communication Commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Coulmbia, MD 21046

To Whom It May Concern:

This is a formal request for a Class II Permissive change on FCC ID: LDK-LTEAEAB8.

This Class II Permissive Change adds operation of LTE Band 8 at frequencies limited to 897.5-900.5 MHz and 936.5-939.5 MHz as defined under Part 27 Subpart P, to the FCC grant of Equipment Authorization issued on July 27th 2021.

No hardware or software was changed to support this request. The general capability to operate in LTE Band 8 previously existed in the module for operation outside the US. The capability to operate on Band 8 in the US was not originally enabled, marketed, or tested since FCC rules regarding the band were not finalized at that time.

This submission provides test report evidence to support LTE Band 8 approval, under FCC ID: LDK-LTEAEAB8. Cisco Systems, Inc. Intends to integrate this module under this identification into a Cisco manufactured host product

Sincerely

A handwritten signature in black ink that reads "Adam Walb".
