

## **ATTESTATION**

Date: April 28, 2023

RE: Attestation of Indoor (low-power) Client Operation

FCC ID: VPYLBEE5XV2EA

ISED certification number: 772C-LBEE5XV2EA

Dear Examiner,

We, (Murata Manufacturing Co., Ltd.), attest that this client device complies with the following requirements of the FCC's and ISED's rules for the 6GHz bands:

- 1. Contention-Based Protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent.
- 2. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- 3. This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- 4. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.
- 5. Control of or communications with unmanned aircraft systems, including drones are prohibited.
