To Whom It May Concern:

Question 1) This is a composite application with the UNII/DTS application. In the UNII/DTS application you requested modular approval. However there is no information in this application regarding modular approval. It is my understanding that this will be a Limited Modular Approval. What host device restrictions are to be placed on this device?

Response: LDK102059 was configured and tested in the Cisco Systems AIR-AP1250 series host. At this time this is the only intended host for this radio module.

Best Regards,
