Hello Jim, Trinh,

Review of this C2PC application is complete. Please reply to the following items.

Q1: The original application was approved with antennas up to 17 dBi. The C2PC letter specifies the addition of a 23 dBi patch antenna. The test report also includes test data for a 28 dBi parabolic antenna. Please confirm the intent to add the 28 dBi antenna and provide a revised C2PC letter.

Q2: Please provide an antenna specification exhibit for the 28 dBi antenna.

Q3: Please provide a revised user manual, addendum or other document with updated RF exposure, and transmit power levels associated with the new antennas. Also identify if the antennas are for point-to-point use.

Q4: The grantee contact currently identified in the FCC database is Gerard Thorpe. The authorized signatory exhibit is signed by Andrew Griffin. Please provide an updated letter signed by Gerard Thorpe or revise the contact in the FCC database. This is an FCC requirement.

Q5: Please acknowledge the addition of a line entry on the grant related to HT-40 mode as follows: 5745-5805 MHz 0.380 W. Only the original line entry was entered on the application.

Q6: Please confirm that there have been no hardware changes and that all exhibits from the original filing (block diagram, schematic, photos, etc) continue to be representative of the product.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Tim Dwyer

Hello Jim, Trinh,

Review of this C2PC application is complete. Please reply to the following items.

Q1: The original application was approved with antennas up to 17 dBi. The C2PC letter specifies the addition of a 23 dBi patch antenna. The test report also includes test data for a 28 dBi parabolic antenna. Please confirm the intent to add the 28 dBi antenna and provide a revised C2PC letter.

I have attached a revised C2PC letter including the 28dBi antenna.

Q2: Please provide an antenna specification exhibit for the 28 dBi antenna.

[Attached here.](#)

Q3: Please provide a revised user manual, addendum or other document with updated RF exposure, and transmit power levels associated with the new antennas. Also identify if the antennas are for point-to-point use.

[I'll get you the updated user document shortly. The 28dBi antenna is for point-to-point use.](#)

Q4: The grantee contact currently identified in the FCC database is Gerard Thorpe. The authorized signatory exhibit is signed by Andrew Griffin. Please provide an updated letter signed by Gerard Thorpe or revise the contact in the FCC database. This is an FCC requirement.

[Please send me a copy of the authorized signatory exhibit you are referencing and I'll get it updated.](#)

Q5: Please acknowledge the addition of a line entry on the grant related to HT-40 mode as follows: 5745-5805 MHz 0.380 W. Only the original line entry was entered on the application.

[I acknowledge the addition of a line entry on the grant related to HT-40 mode as follows: 5745-5805 MHz 0.380 W](#)

Q6: Please confirm that there have been no hardware changes and that all exhibits from the original filing (block diagram, schematic, photos, etc) continue to be representative of the product.

[So confirmed](#)

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted.
