Correspondence Reference Number: 45059
FCC I.D. : LDK102089P
Form 731 Confirmation: EA351549

Mr. Rodriguez,

In response to your email inquiry of 7Jan2014;

- 1) The statement; "See the Theory of Operation for details on the correlated gain for each mode." Is from an old report template and should have not appeared in the report since FCC KDB 662911 now governs these issues. It will be removed from future report templates.
- 2) The correlation gains listed for Total Power and Power Spectral Density are based on and compliant to FCC KDB 662911.

Regards,

Bud Chiller
