

### Deviation Statements

Date: June. 12. 2017

The Equipment Under Test (FCC ID: LDK60241556, IC: 2461N-60241556) uses Nvidia module (FCC ID: VOB-P2180, IC: 7361A-P2180), with exact hardware version as certified by Nvidia.

The software deviations are: ☐

1. 40MHz mode is disabled for 2.4G 802.11n mode.
2. Output power is reduced on certain RF channels and modulations for 5G WLAN. The original power and reduced power are listed below.

| Modulation     | 802.11a |  |  |  | 802.11n20 |  |  |  |
|----------------|---------|--|--|--|-----------|--|--|--|
| Channel        | NA      |  |  |  | 64        |  |  |  |
| Original power | NA      |  |  |  | 14        |  |  |  |
| Reduced power  | NA      |  |  |  | 10        |  |  |  |

| Modulation     | 802.11n40 |     |  |  | 802.11n80 |  |  |  |
|----------------|-----------|-----|--|--|-----------|--|--|--|
| Channel        | 62        | 102 |  |  | 58        |  |  |  |
| Original power | 12        | 9.5 |  |  | 11        |  |  |  |
| Reduced power  | 8         | 8   |  |  | 10        |  |  |  |

EUT uses different external antennas than the ones in Nvidia certificates. Please refer to the antenna datasheet for details.
