We, Cisco Systems, Inc., declare that the model: CP-6861, FCC ID: LDK68612057 device implements dynamic frequency selection (DFS), as a slave device nor implementing radar detection.

The device does not support "Ad-Hoc and peer-to peer" modes on 5250 ~ 5350MHz / 5470 ~ 5725 MHz US frequency and would not initiate any transmission on DFS frequencies without initiation by a master by installed driver, and software

Below is the channel / frequency plan for the device

2400-2483.5	Passive	No	No
5150-5250	Passive	No	No
