Subject: Passive Scan, Client Device for IC: 2461B-7925G0269

To Whom It May Concern:

The IC: 2461B-7925G0269 operates as a Client device in the DFS LELAN bands. As a Client device the IC: 2461B-7925G0269 will not transmit unless there is an approved Master device operating. As a client device the WLAN module passively scans (Listening) for a Master device and can no operate in ad-hoc mode.

In the 5600-5650 MHz band the IC: 2461B-7925G0269 operates as stated above and will not transmit in this band as there will not be any Master device operation in this band.

If you have any questions, please do not hesitate to contact us at 408-853-9174.
