Re: FCC ID: LDKDX6500716

Applicant: Cisco Systems Inc

I have reviewed KDB 443999 (Interim Plans to Approve UNII Devices Operating in the 5470 - 5725 MHz Band with Radar Detection and DFS Capabilities). The CP-DX650 Video Endpoint is a Client/Slave Device with No Radar Detection functionality or DFS Capability. This device will only transmit on those channels broadcasted by the Master Device and will not deviate.

Since the CP-DX650 is a Client/Slave Device and meets all the other requirements specified in Section 15.407 we comply with the FCC rules and KDB 443999 Guidelines.

Best Regards,
