

# JSW Pacific Corporation

FCC ID:LE2G4  
Model:G4  
FCC ID:LE2GC43  
Model:GC43

May 25,2012

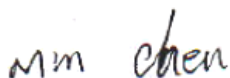

Federal Communications Commission  
Authorization and Evaluation Division  
7435 Oakland Mills Road  
Columbia, MD 21046

To Whom It May Concern:

Model G4 is a monitor as a receiver, and model GC43 is a camera as a transmitter. They communicate with each other after they are paired by pressing the link button. Power on the camera and monitor separately, press the link button of camera, then press the camera setup option of monitor, the monitor will scan and search the valid camera id, select a camera id and press pairing. After several seconds, the light of link status of camera changes to orange, the camera is connected to the receiver now and they can communicate with each other. The user manual describes how to link.

As requirements of FCC and IC rules, the model G4 and GC43 have to certify separately. They use the same RF module.

Sincerely yours,

---

Min Chen/Vice President
