

Antenna Information for PTM Model 97745

The PTM Model 97745 uses two antenna's. The main Telemetry-M antenna is a multi-turn helical antenna soldered into the bottom of the PCB assembly. The Bluetooth antenna is a PCB antenna. No replacement of antennas is required.

The Bluetooth antenna used in the PTM Model 97745 is a monopole antenna incorporated into the Printed Circuit Board. Therefore the specific antenna will be used in all cases by default. The Bluetooth antenna used in the PTM Model 97745 is a part of the PCB and has no model number. It is manufactured by Medtronic, Inc and is a planar monopole antenna. The gain for the PTM3 Bluetooth antenna is -1.37 dBi.

The primary Telemetry-M antenna is manufactured by Medtronic and has a maximum gain of 0 dBi.
