FCC Laboratory
7435 Oakland Mills Rd
Columbia, MD 21036

Gentlemen:

This correspondence is being submitted to request implementation of an additional band listing for FCC ID: LF5MICSW2. The device is a Home Monitor transmitter that is part of a Medical Implant Communications System.

During the filing process inadvertently the 175 kHz operation of the Home Monitor was omitted. The 175 kHz circuitry in the monitor had been previously certified under FCC ID: LF5MICSW and no changes were made to the 175 kHz transmitter operation for the new FCC ID: LF5MICSW2.

We attest that all units manufactured under FCC ID: LF5MICSW2 incorporate the 175 kHz operation and no changes or modifications have been made to the unit since the original grant. A complete FCC Part 15C test report supporting the 175kHz operation is available with the same dates as the Part 95 operation of the unit.

Should you have any questions pertaining to this matter, I can be reached at the number below.

Respectfully,

Phillip Inglis
