Subject: FCC ID: LGYBT261159

Mr. Fujimoto:

In order for processing of this certification application (FCC ID: LGYBT261159) to continue, the following issue(s) will have to be addressed:

- 1) The authorization letter must be addressed to CETCB, and not the FCC in the text of the letter.
- 2) The certification contract on file is out of date. Please submit a signed copy of a current contract.
- 3) This new antenna has a cable with connectors connecting it to the module, whereas before the antenna was soldered directly onto the circuit board. Will this device always be installed with the same type and length of cable? How will this be controlled?
- 4) Please provide RF hazard estimations for the device with this new antenna.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is LGYBT261159-1.

Best regards,

Scott McCutchan
