**Subject: Band Usage Attestation, FCC ID: LHJ-CUW**

Dear Application Examiner,

The final market for this module will be outside of the United States; however, the module will be assembled into vehicles within the US. For this reason, the OEM integrator requires access to the U.S. network for short durations during the assembly process. This will be done using LTE and/or WCDMA Band 2 only. Therefore, Continental is only seeking FCC certification for LTE/WCDMA Band 2 as a new original equipment application.

The additional cellular technologies and bands as well as WLAN of which the module is capable, will not be operated in the United States.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jeremy Pickens'.
