APPLICANT: WELL-TECH TOYS CO., LTD.
FCC ID: LIE925

Operational Circuit Description

When the user presses the control keys. Then control signal is amplified by Q2 and modulated to a high frequency signal, which generated from oscillator composed by Q1 and X1. Modulated signal is then coupled through the filter composed by C4, C8 and L1 to antenna.

Power supply and Ground

One 9V battery is the only power supply for the transmitter. No external power is needed.
