

## TEST REPORT APPLICABILITY BETWEEN RM-199 and RM-106

This application of FCC ID: LJPRM-106 reuses some test reports from LJPRM-199. The difference between these two products is firmware tuning values of output power for WLAN 802.11b/g operation. Therefore,

- all GSM test results (part 22/24) of LJPRM-199 are applicable
- all WLAN (part 15C) tests have been redone
- SAR report of LJPRM-199 is applicable otherwise except for WLAN part, which has been remeasured for LJPRM-106. LJPRM-199 SAR report is used as supplemental report for LJPRM-106 SAR Report, and final results are calculated for LJPRM-106 report.
