RE: FCC ID: LJPRM-310_ATCB005074
Attention: Kare Oksanen

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the label sample provided does not appear to be the FCC ID or IC label. Please provide a correct FCC ID label sample.
2. Please note that on page 3 of the test report it states "*The test results of LJPRM-243 are re-used for certification of the LJPRM-310.*" Testing must be on the device for which certification is being requested. Please explain and provide adequate justification as to why the test results mentioned are applicable to the RM-310 device.
3. Please note that section 3.2 of the part 22.24 report "Limits for spurious radiated emissions measurements" lists WCDMA. Please explain. Does this device use WCDMA850 or 1900 technology?
4. Please note that the SAR report states use of data from RM-243. Please explain and please justify why this data is relevant to the RM-310 device. Please account for any changes or modifications between the two devices.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
