RE: FCC ID: LJPRX-44_ATCB005449
Attention: Kare Oksanen

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the power relationship between the SAR testing and the EMC testing needs to be of the same type (i.e. either conducted power or radiated power). Please note that the SAR report appears to show radiated power but the EMC report shows conducted power. Please provide either the radiated power measured for EMC or the conducted power measure during SAR so that a comparison may be made between the two. Please note that if conducted power is used then the difference between the SAR and EMC report should not be greater than 0.5dB.
2. Please provide the RSS102 annex A and B exhibit.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
