Attestation of Operating Frequency Range  
Equipment: Dual Band Point-to-Point Radio Transceiver  
Frequencies of Operation: 4945-4970 MHz (Part 90Y)  
5730-5830 MHz (Part 15.247)  
FCC ID: LKT-BNETB-49

To Whom it May Concern,

This is to attest that the referenced radio will be sold in the United States with operating frequency ranges limited to those shown above. There are no user accessible controls in hardware or software to add any additional operating bands.

Operating frequencies are set by software at the factory. The user manual supplied with this product includes frequency plans available in other countries, but these additional frequencies will not be available in the United States for this product.
