RE: Removal of 5.3 GHz coverage

Dear Andy,

On 26 April 2010 I was instructed by my client to upload documentation to add 5.3 GHz band capabilities to this product via software settings. As it turns out, I was given this information in error. The reference product will not support 5.25-5.35 GHz operation. Please remove the references from the application and the relevant attachments. This product supports only 5.47 GHz U-NII and 5.8 GHz DTS operation.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS  
EMC Consultant/Agent for Alvarion Ltd.
