Attention: Application Examiner

Applicant: Alvarion Ltd.
Re: Part 15 Class 2 Permissive Change Certification Application
FCC ID: LKT-VL-53C

To whom it may concern,

A class 2 permissive change is requested for the referenced U-NII device. The following change has been implemented:

Addition of DFS capability for 40 MHz channel bandwidths by enabling DFS software.

Depending on software settings, the EUT can perform as a DFS master (base station) or slave (subscriber unit). No hardware changes are necessary to change EUT configuration from master to slave.

The sample for this product has already been requested and is currently at the FCC Laboratory.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Alvarion Ltd.
