Attention: Mike Kuo
 Reviewing Engineer

Applicant: Alvarion Ltd.

Re: Class 2 permissive change for FCC ID: LKT-VL-IF

Dear Mike,

Alvarion has developed a cost reduced version of the referenced product. The primary change is that the power amplifier transistor chain was replaced by a single MMIC with the same power output as the original amplifier. Measured output power is within 0.3 dB of that measured for the original product.

Test report, test setup photographs, and internal photos (showing MMIC) of the EUT are presented in separate attachments.

Also, request is hereby submitted, on behalf of Alvarion Ltd. to withhold from public review certain portions of the application for equipment certification for the referenced FCC identifier. In particular, the following sections of the application and report are requested to be kept confidential:

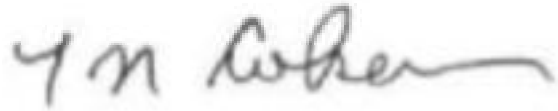

Schematics

Rationale for request for confidentiality:

Alvarion has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the confidential portions of this application to competitors would give them competitive advantage in developing similar products.

If you have questions or need further information, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "T N Cokenias". The signature is fluid and cursive, with a long horizontal stroke at the end.

THOMAS N. COKENIAS
EMC Consultant/Agent for Alvarion Ltd.
