RE : Application for obtaining a transmitter approval
Attached Application Form 731
FCC ID: LLB09001

Dear Sir or Madam:

Aclara RF Systems Formally Hexagram Inc. wishes to obtain approval for a telemetry transceiver with the FCC ID LLB09001.

The LLB09001 transceiver is used to transmit data from a utility meter to a data collection unit.

The LLB09001 Transceiver device is the 2-way communication device, which includes a Transmitter and a Receiver.

Complete information about LLB09001 device is documented in the attached application documentation including schematics and photographs. The LLB09001 transmitter was tested for conformance to the technical requirements of 90.201 Subpart I-General Technical Standards. Results of tests are attached to this application.

The LLB09001 was found to comply with all technical requirements of 90.201.

Sincerely,
Mark Wilbur
Principal Engineer
RF & Microwave Technology
